

Let's know our Department Scientifically

Orientation Session by the students and for the students

Organizers: 4th Semester 2022

Often it is observed that the students working in a laboratory for their MSc project are not aware of what is being done by the other student in the neighbouring laboratory. The students of the ongoing 4th Semester decided to bridge the gap not only within their batch but also for their juniors.

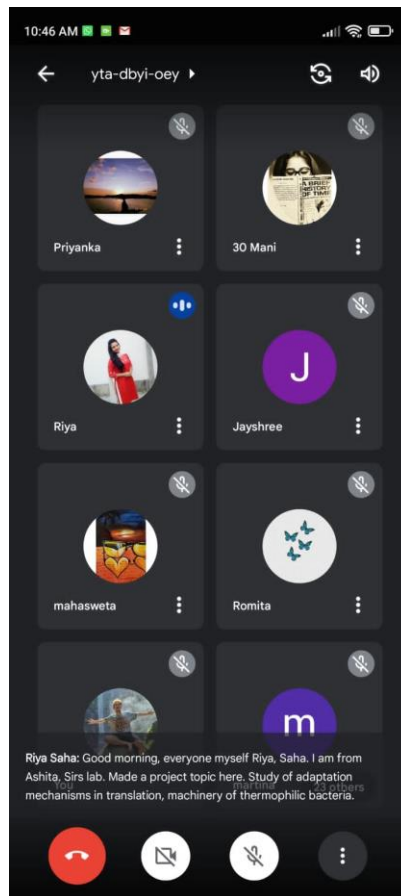

The 4th Semester Students (2020-2022)

Ms Manikankana Laskar took the responsibility upon her with active participation of all her batch mates to organize two orientation sessions. On 15th July 2022, the students of the 4th semester familiarized themselves with all the different projects being carried out in the four laboratories of the department. In this offline session the students of 4th semester discussed their respective projects among themselves along with a QnA part. It was a kind of preparation for their upcoming project presentation.

Offline Session of Orientation by the 4th Semester Students

On 20th July 2022 an online session for students of 2nd semester was organized by the 4th semester students where they gave a brief overview of their projects to the students of 2nd semester. Both the sessions saw active participation from everyone.

The journey towards nation building begins here.....
