### NOTIFICATION

#### **Subject: Installation of Oil & Sugar Awareness Boards**

This is to notify for information to all concerned that, in accordance with the recent directives from the Ministry of Health and Family Welfare and the University Grants Commission (UGC), Tripura University is undertaking measures to promote healthy eating habits and raise awareness about the health risks associated with excessive consumption of oil and sugar.

As part of this initiative, **Oil & Sugar Awareness Boards** (copy enclosed) will be displayed on the University's digital display system. The same needs to be displayed in the canteens, corridors and other high-traffic areas across the campus. All Departments are directed to place the same on their respective departmental notice boards.

This notification is issued with the approval of the Competent Authority.

  
(Dr. Deepak Sharma)  
Registrar

**Subject: Installation of Oil & Sugar Boards - regarding.**

आदरणीय महोदया/महोदय,

The Ministry of Health and Family Welfare, Government of India, in its recent communication, has pointed out that obesity in India is a serious public health concern, closely linked to chronic diseases such as hypertension, type 2 diabetes, heart disease, and certain cancers. Tackling obesity among the younger generation is vital to ensuring a healthier, more resilient future. Early intervention can significantly reduce the risk of developing non-communicable diseases (NCDs) later in life.

Consumption of nutritious foods such as fruits, vegetables, lean proteins, and whole grains provides essential nutrients and promotes satiety, while processed and sugary foods contribute to weight gain with little nutritional value.

To promote healthier dietary habits among youth, it is proposed that "Sugar and Oil Boards" be installed in all Higher Education Institutions. These boards will showcase facts about hidden fats and sugars in everyday foods, empowering students to make informed and mindful choices. Placing them in high-visibility areas such as corridors, canteens, and meeting rooms is expected to encourage healthier eating habits and reduce diet-related diseases.

A sample board shared by the Ministry of Health and Family Welfare is attached to this letter.

In this regard, all Higher Education Institutions are requested to adopt the following measures:

1. Install "Oil & Sugar Board" displays (digital/static) in common areas including canteen to highlight the risks of excess oil and sugar consumption.
2. Promote healthy habits in higher education institutions by offering more nutritious food options, limiting sugary drinks and high-fat snacks, and encouraging physical activity (stairs, walking routes, short exercise breaks).
3. Conduct regular nutrition and fitness workshops/webinars to reinforce awareness and support obesity prevention.

While these measures will help combat non-communicable diseases (NCDs), they will also foster a healthier, more resilient youth. All Higher Education Institutions are therefore requested to implement the above suggestions in letter and spirit, actively contributing to the promotion of a stronger, healthier generation.

सादर,

भवदीय,

## Sugar Facts

## Sugar Board

**SUGAR IS MORE FOR TASTE, SERVES NO NUTRITION...**

**less sugar, more life**

MAXIMUM SUGAR INTAKE PER DAY - 25g =  x5 =     tsp

सेहत है तो सब कुछ है

### Do you know?

पता है क्या ?

- All packaged foods have information on sugar; read labels
- Sugar can be disguised as sucralose, mannitol, erythritol, xylitol, sorbitol
- Jaggery, honey, date syrup, maple syrup, brown sugar, caramel, molasses are equally bad

Sugar consumption is linked to overweight and obesity

**Sugar? No Please!**

### Sugar Showdown!
