

# **Tripura University**

**(A Central University)**

**Suryamaninagar**

**West Tripura**

**Syllabus for**

**Four Years Undergraduate Programme**

**Subject: Bachelor in Computer Applications**

**(As per NEP-2020)**

**Year - 2023**

**Tripura University**  
(A Central University)

**Course Structure of BCA (UG Programme)**  
**As per NEP-2020 under Tripura University**

**Bachelor in Computer Applications (BCA) MAJOR**

| Year                  | Semester                                                                              | Paper                  | Credit | Mark                    |                                 |

**Total Credits after completion of 1<sup>st</sup> Year=36+4\* =40 Credits**

- 16 credits Major
- 8 Credits Minor
- 3 Credits Interdisciplinary Course (Prerequisite Allied/MOOC)
- 6 Credits Skill Enhancement/ Vocational
- 3 Credits Ability Enhancement Courses (language)
- 4\* Credits Common Value-Added Courses (VAC Project/ Internship/ Survey)

**Students Exiting the program after securing 40 Credits will be awarded UG CERTIFICATE IN COMPUTER APPLICATIONS provided they secure 4\* credits in skill based vocational courses offered during the 1<sup>st</sup> year summer term semester (exiting students need to undertake an internship of 4 credits additionally)**

|---------------------------------------------|----------------------------|
| <b>Fundamentals of Computer Application</b> | <b>CA1101C</b>             |
| <b>(T+L): 4 Credits</b>                     | Prerequisites: <i>None</i> |

**PART A (Theory)**

**UNIT I**

**Introduction:** Characteristics of Computer, Generation of computer, Application of computer;

**Software:** Definition, Relationship between Software and Hardware, Software Categories, System Software, Application Software and other software's with example;

**Number Systems:** Types of Number systems, Conversion between number bases, Binary arithmetic including 1's complement and 2's complement;

**UNIT II**

Block diagram of digital computer and function of each block; Introduction to computer memory, Types of computer memory; Input & Output Devices. Data & Information, Different data processing methods,

**UNIT III**

Introduction to Computer Languages. Introduction to Operating System: Types of Operating, System, Functions of Operating System, Processing function of an Operating System with example.

**UNIT IV**

**Data Communication and Computer Network:** Introduction, Data Transmission mode, Transmission Media, Types of Computer Network, Network Topologies, Communication Protocols, Network devices;

**Internet Basics:** Introduction, Basic Internet Terms (Website, Webpage, URL, Web Browser etc.), Internet Applications, Electronic Mail: Working principle, Search Engines, Intranet, Extranet, Data Security: Need of security, Basic principle of security.

**PART B (Laboratory Works)**

1. Assembling and De-Assembling of Computer, Installation of Operating System.
2. Installation of different software, Licensing of software.
3. Introduction to MS-DOS, System files, Internal and External Commands, Batch processing.
4. WINDOWS: File System, Start button and menus, Hide and Unhide properties of files and folders. Utilities of icons, Recycle bin, Task bar, Desktop background, Screen saver, working with control panel.
5. Word Processor: Utilities of Menu bar, Toolbar, Text, Font, Styles and background, Watermark, Table, Page border, Indentation, Page orientation, Equation Editor, Mail merge, Protection of the documents.
6. Spreadsheet: Formulas, Validations, Basic functions and Chart.
7. Presentation: Animation, Custom Animation, Slide Transaction, Mouse click presentation, Automatic presentation.
8. Study of IP and MAC Addresses and basic network utility commands.

DEPARTMENT OF INFORMATION TECHNOLOGY/सूचना प्रौद्योगिकी विभाग

त्रिपुरा विश्वविद्यालय / TRIPURA UNIVERSITY

सूर्यमणिनगर / Suryamaninagar, त्रिपुरा/ Tripura - 799022

|                                 |                            |
|---------------------------------|----------------------------|
| Programming Methodology using C | CA1102C                    |
| (T+L): 4 Credits                | Prerequisites: <i>None</i> |

**PART A (Theory)**

**UNIT-I** Introduction, Classification of Computer Languages, Characteristics of a good programming Language, Algorithm, Flowchart, Pseudocode, Testing and Debugging

**UNIT-II**

Introduction of C program, Basic structure, Character set, Types of Tokens, Keywords, Identifiers, Constants, Variables, Rules of declaring variables. Data types, program structure; Operators and Expressions, Precedence and Association.

**UNIT-III**

Control statements: IF, Nested IF, IF-Else, For, nested for, Switch, While, Do-While, Goto, Continue, Return and Break, multiple loop variables, specifying test condition for selection and iteration, simple programming.

**UNIT-IV**

**Arrays:** Array notation and representation, manipulating array elements, arrays of unknown or varying size, One-dimensional and two-dimensional arrays; Strings and standard functions. **Pointers:** Declaration and Initialization, accessing variables through pointer arithmetic, Pointers and arrays.

**UNIT-V**

**Basic of a function, Recursion and Structures:** Introduction to function, Types of function: Call by value and call by reference, Types of recursion, Rules for recursion function, Recursion vs Iteration. Storage class, Structure and Union, Features of structures, Declaration and initialization of structures, Arrays of structures, Pointers to structures, Structure and functions.

**PART B (Laboratory Works)**

- 1: Basic programs using printf and scanf Statement.
- 2: Programs with various operators.
- 3: Programs with Decision statement.
- 4: Programs with Switch Case.
- 5: Various Programs with Loop Statements and nested loop.
- 6: Programs with Arrays.
- 7: Programs with Strings.
- 8: Programs with functions.
- 9: Programs with Structures.
- 10: Programs with pointers.

DEPARTMENT OF INFORMATION TECHNOLOGY/सूचना प्रौद्योगिकी विभाग

त्रिपुरा विश्वविद्यालय / TRIPURA UNIVERSITY

सूर्यमणिनगर / Suryamaninagar, त्रिपुरा/ Tripura - 799022

|                   |                     |
|-------------------|---------------------|
| Basic Electronics | CA1201C             |
| (T+L): 4 Credits  | Prerequisites: None |

**PART A (Theory)**

**UNIT I**

**Basic Electronic Components:** Resistors, Capacitors, Inductors, Diodes, Transistors, Voltage Source, Current Source, Transformers. Introduction to AC and DC signals, Periodic & Non- Periodic Signals. **Various Network Laws:** Ohms' Law, Joule's Law of Electric Heating, Current Division Law, Voltage Division Law, Kirchhoff's Voltage and Current Law. **Connection Types:** Series and Parallel connection. Star- Delta transformation – Simple Problems on all mentioned topics.

**UNIT II**

**Semiconductors:** Definition, Intrinsic and Extrinsic Semiconductor, Structure of Silicon and Germanium, Energy Band Diagram of Conductor, Semiconductor and Insulator.

**Diode and its Applications:** P-N Junction Diodes, Forward and Reverse Biased Condition, V-I Characteristics of P-N Junction Diodes, Rectifier Circuits: Half Wave and Full Wave Rectifier (Construction and Working Principle), Ripple Factor, Filter Circuits. Clipping and Clamping Circuits, Zener Diode, V-I Characteristics of Zener Diode and Photo Diodes

**UNIT III**

**Transistors:** Symbolic Representation, Diode Analogy, Construction, Working Principle, Transistor as Amplifier, Transistor Configurations (CE, CB, CC), Transistors Regions of Operation, Transistor Load Line Analysis, Types of Transistor, JFET & MOSFET (Type, Operation & V-I Characteristics).

**UNIT IV**

Introduction to the Digital Signals, Digital Operations and Logic Levels.

**Logic Gates:** Definition, Symbol, Truth Table, Classification.

**Boolean Algebra:** Laws, Simplification of Boolean identities, Realization of Boolean identities using basic and universal gates; SSOP, SPOS, K-map (up to 4 variables): Simplification (min SOP/min POS) of Boolean expression and Realization of resultant output by Basic and Universal gates

**Digital Circuits:** Different types of Digital Circuits, Idea of Combinational Circuits and Sequential circuits. Overview of Different Types of Combinational and Sequential Circuits.

**PART B (Laboratory Works)**

1. Identify various passive components in the given circuit
2. Identify various active components in the given circuit
3. Determine the value of given resistor using digital multi-meter to confirm with color code.
4. Connect resistors in series combination on bread board and measure its value using multi-meter.
5. Connect resistors in parallel combination on bread board and measure its value using multi-meter
6. Study the V-I Characteristics of P-N Junction Diode in Both Forward and Reverse Biased Mode.
7. Study the V-I Characteristics of Zener Diode in Both Forward and Reverse Biased Mode.
8. Study the Characteristics of BJT in Common Emitter Configuration.
9. Study the Characteristics of BJT in Common Base Configuration.
10. Study the Characteristics of BJT in Common Collector Configuration.
11. Verify the truth table of different Logic gates (Basic, Universal and Exclusive gates)

DEPARTMENT OF INFORMATION TECHNOLOGY/सूचना प्रौद्योगिकी विभाग

त्रिपुरा विश्वविद्यालय / TRIPURA UNIVERSITY

सूर्यमणिनगर / Suryamaninagar, त्रिपुरा/ Tripura - 799022

12. Realize Boolean Expressions with Different Logic Gates.

|                         |                            |
|-------------------------|----------------------------|
| <b>Operating System</b> | <b>CA1202C</b>             |
| <b>(T+L): 4 Credits</b> | Prerequisites: <i>None</i> |

**PART A (Theory)**

**UNIT I**

**Introduction:** System Software, Resource Abstraction, OS strategies. Definition of OS, Purpose, Early Batch Systems, Buffering and spooling Batch Systems.

**Types of operating systems:** Multiprogramming, Batch, Time Sharing, Single user and Multiuser, Process Control & Real Time Systems.

**Operating System Organization:** Factors in operating system design, basic OS functions, implementation consideration; process modes, methods of requesting system services – system calls and system programs. System Structure.

**UNIT II**

**Process:** Process Concepts, Process Model, Process state and process control block, Threads, Threads in Linux.

**Scheduling:** Process scheduling, Different process scheduling algorithms.

**Process Synchronization:** Mutual Exclusion, Semaphores, Critical Section Problems. Case study on Dining Philosopher Problem.

**UNIT III**

**Deadlocks:** examples of deadlock, resource concepts, necessary conditions for deadlock, deadlock solution, deadlock prevention, deadlock avoidance with Bankers algorithms, deadlock detection, deadlock recovery.

**Device Management:** Disk Scheduling Strategies, Rotational Optimization, System Consideration, Caching and Buffering.

**UNIT IV**

**Memory Management:** Logical versus physical address space, Swapping, memory allocation strategies, External and Internal Fragmentation, Paging and Segmentation, Semaphore, Virtual memory.

**File System:** Introduction, File Organization, Logical File System, Physical File System, File Allocation strategy, Free Space Management, File Access Control, Data Access Techniques, Data Integrity Protection.

**PART B (Laboratory Works)**

1. Basic commands of LINUX
2. Editing Files with Vi editor, Viewing Files, Combining Files and Using Wildcards, and Moving Around in Directories.
3. Linking Files, Removing and restoring Files, and Permissions.
4. Simple Shell-Programming.

सूर्यमणिनगर / Suryamaninagar, त्रिपुरा/ Tripura - 799022

**PRE-REQUISITE COURSES FOR STUDENTS who are MIGRATING to Bachelor of Computer**

**Application (BCA) Program in 2nd Year for Admission**

| Yr | Sem | Course Code | Course Title                                    | Credits | Type             |
|----|-----|-------------|-------------------------------------------------|---------|------------------|
| I  | I   | CA1100A     | Introduction to Computer Systems                | 4(T+L)  | Pre-Requisite-I  |
|    | II  | CA1200A     | Introduction to Programming Methodology using C | 4(T+L)  | Pre-Requisite-II |

|                                         |                            |
|-----------------------------------------|----------------------------|
| <b>Introduction to Computer Systems</b> | <b>CA1100A</b>             |
| <b>(T+L): 4 Credits</b>                 | Prerequisites: <i>None</i> |

**PART A (Theory)**

**UNIT I**

**Introduction:** Characteristics of Computer, Generation of computer, Application of computer;

**Software:** Definition, Relationship between Software and Hardware, Software Categories, System Software, Application Software and other software's with example;

**Number Systems:** Types of Number systems, Conversion between number bases, Binary arithmetic including 1's complement and 2's complement;

**UNIT II**

Block diagram of digital computer and function of each block; Introduction to computer memory, Types of computer memory; Input & Output Devices. Data & Information, Different data processing methods,

**UNIT III**

Introduction to Computer Languages. Introduction to Operating System: Types of Operating, System, Functions of Operating System, Processing function of an Operating System with example.

**UNIT IV**

**Data Communication and Computer Network:** Introduction, Data Transmission mode, Transmission Media, Types of Computer Network, Network Topologies, Communication Protocols, Network devices;

**Internet Basics:** Introduction, Basic Internet Terms (Website, Webpage, URL, Web Browser etc.), Internet Applications, Electronic Mail: Working principle, Search Engines, Intranet, Extranet, Data Security: Need of security, Basic principle of security.

**PART B (Laboratory Works)**

1. Assembling and De-Assembling of Computer, Installation of Operating System.
2. Installation of different software, Licensing of software.
3. Introduction to MS-DOS, System files, Internal and External Commands, Batch processing.
4. WINDOWS: File System, Start button and menus, Hide and Unhide properties of files and folders. Utilities of icons, Recycle bin, Task bar, Desktop background, Screen saver, working with control panel.
5. Word Processor: Utilities of Menu bar, Toolbar, Text, Font, Styles and background, Watermark, Table, Page border, Indentation, Page orientation, Equation Editor, Mail merge, Protection of the documents.
6. Spreadsheet: Formulas, Validations, Basic functions and Chart.
7. Presentation: Animation, Custom Animation, Slide Transaction, Mouse click presentation, Automatic presentation.
8. Study of IP and MAC Addresses and basic network utility commands.

**BACHELOR IN COMPUTER APPLICATIONS (BCA)**

DEPARTMENT OF INFORMATION TECHNOLOGY/सूचना प्रौद्योगिकी विभाग

त्रिपुरा विश्वविद्यालय / TRIPURA UNIVERSITY

सूर्यमणिनगर / Suryamaninagar, त्रिपुरा/ Tripura - 799022

|                                                 |                            |
|-------------------------------------------------|----------------------------|
| Introduction to Programming Methodology using C | CA1200A                    |
| (T+L): 4 Credits                                | Prerequisites: <i>None</i> |

**PART A (Theory)**

**UNIT-I** Introduction, Classification of Computer Languages, Characteristics of a good programming Language, Algorithm, Flowchart, Pseudocode, Testing and Debugging

**UNIT-II**

Introduction of C program, Basic structure, Character set, Types of Tokens, Keywords, Identifiers, Constants, Variables, Rules of declaring variables. Data types, program structure; Operators and Expressions, Precedence and Association.

**UNIT-III**

Control statements: IF, Nested IF, IF-Else, For, nested For, Switch, While, Do-While, Goto, Continue, Return and Break, multiple loop variables, specifying test condition for selection and iteration, simple programming.

**UNIT-IV**

**Arrays:** Array notation and representation, manipulating array elements, arrays of unknown or varying size, One-dimensional and two-dimensional arrays; Strings and standard functions. **Pointers:** Declaration and Initialization, accessing variables through pointer arithmetic, Pointers and arrays.

**UNIT-V**

**Basic of a function, Recursion and Structures:** Introduction to function, Types of function: Call by value and call by reference, Types of recursion, Rules for recursion function, Recursion vs Iteration. Storage class, Structure and Union, Features of structures, Declaration and initialization of structures, Arrays of structures, Pointers to structures, Structure and functions.

**PART B (Laboratory Works)**

- 1: Basic programs using printf and scanf Statement.
- 2: Programs with various operators.
- 3: Programs with Decision statement.
- 4: Programs with Switch Case.
- 5: Various Programs with Loop Statements and nested loop.
- 6: Programs with Arrays.
- 7: Programs with Strings.
- 8: Programs with functions.
- 9: Programs with Structures.
- 10: Programs with pointers.

| <b>(T+L): 4 Credits</b>               | Prerequisites: <i>None</i> |

**PART A (Theory)**

**UNIT-I**

**Introduction:** Concepts of data Structures-, Data Structure Operations, Abstract data Types. Algorithms – Complexity.

**UNIT-II**

**Linear Data Structures:** Sequential Representations:

**Arrays:** Terminology, Single and Multi-Dimensional Arrays, Operations on Arrays, Sparse Matrices.

**Linked List:** Linear Linked List, Circular Linked List, Doubly Linked List and their Applications.

**UNIT-III**

**Stacks:** Implementing Stack using Array and Linked List, Prefix, Infix and Postfix expressions, Utility and conversion of these expressions from one to another;

**Queues:** Introduction, Array and Linked Representation of Queue, Types of Queue.

**Recursion:** Developing Recursive Definition of Simple Problems and their implementation; Advantages and Limitations of Recursion.

**UNIT-IV**

**Nonlinear Data structures:** Trees: Basic Terminologies; Binary trees: Properties, Traversals, Types of binary tree, AVL tree, B-tree.

**UNIT-V**

**Graphs:** Terminologies, Representation of Graphs, Shortest Path Problem –Dijkstra’s Algorithm, Graph Traversals – BFS, DFS, Minimum Spanning Trees, Euler’s and Hamiltonian Circuits.

**UNIT-VI**

**Searching and Sorting:** Sequential Search and Binary Search with Complexity Analysis, Different types of sorting with complexity analysis.

Insertion Sort, Bubble Sort, Quick Sort, Selection Sort, Heap Sort, Merge Sort, Bucket Sort.

Sequential Search, Ordered Sequential Search, Binary Search, Interpolation Search.

**PART B (Laboratory Works)**

Laboratory works are based on the syllabus of **PART A**.

**PART A (Theory)**

**UNIT I**

Introduction to Database, Application of DBMS, Characteristics of Data in Database. Data Dictionary, Types of Database languages.

Database Management System (DBMS). Characteristics, Advantage and Disadvantage of DBMS. 3-level Architecture of DBMS: External, Conceptual & Internal Levels.

DBA: Role, Functionality and Importance. Relational DBMS, Domains, Attributes, Tuples, Entities & Entity set.

**UNIT II**

Concepts of Keys: Database Constraints, Different types of keys

Fundamental Integrity Rules: Entity integrity, Referential integrity.

Entity-Relationship Diagram (E-R Diagram). Strong & Weak entities, Generalization, Specialization, Aggregation.

Introduction to Relational Algebra, Relational Algebraic Operations: Select, Project, Cross product.

Structured Query Language (SQL), Implementing Query, SQL Functions, View.

Different types of joins.

**UNIT III**

Relational Calculus, Tuple Relational calculus, Domain Relational calculus.

Concept of Database Normalization: 1NF, 2NF, 3NF, BCNF, 4NF 5NF. Functional dependencies, Multivalued dependencies.

**UNIT IV**

Transaction State, Implementation of Atomicity and Durability, Concurrent Executions, Serializability.

**Departmental Optional Papers I/II (Select any two)**

| Course Code | Course Title               | Course Code | Course Title                       |
|-------------|----------------------------|-------------|------------------------------------|
| CA3001E     | Cloud Computing            | CA3005E     | Distributed Computing              |
| CA3002E     | Cyber Security & Cyber Law | CA3006E     | E-Commerce                         |
| CA3003E     | Data Science               | CA3007E     | Formal Languages & Automata Theory |
| CA3004E     | Digital Marketing          | CA3008E     | Internet of Things                 |

**Total Cumulative Credits after completion of 3<sup>rd</sup>Year=114+8\* =122 Credits**

- 64 credits Major
- 24 Credits Minor
- 9 Credits Interdisciplinary Course (Prerequisite Allied/MOOC)
- 9 Credits Skill Enhancement/ Vocational
- 8 Credits Ability Enhancement Courses (language)
- 8\* Credits Common Value Added Courses (VAC Project/ Internship/ Survey)

Students Exiting the program after securing above Credits will be awarded **BACHELOR IN COMPUTER APPLICATIONS(BCA)**

N.B. 50% courses of minor stream must be from the relevant subject/discipline and remaining 50% from any discipline.

**BACHELOR IN COMPUTER APPLICATIONS (BCA)**

DEPARTMENT OF INFORMATION TECHNOLOGY/सूचना प्रौद्योगिकी विभाग

त्रिपुरा विश्वविद्यालय / TRIPURA UNIVERSITY

सूर्यमणिनगर / Suryamaninagar, त्रिपुरा/ Tripura - 799022

|                                    |                            |
|------------------------------------|----------------------------|
| <b>Object Oriented Programming</b> | <b>CA3501C</b>             |
| <b>(T+L): 4 Credits</b>            | Prerequisites: <i>None</i> |

**PART A (Theory)**

**UNIT – I**

**Object Oriented Programming:** Object-Oriented programming features and benefits. Object-Oriented features of C++, Class and Objects, Data Hiding & Encapsulation, Structures, Data members and Member functions, Scope resolution operator and its significance, Static Data Members, Static member functions, Nested and Local Class, Accessing Members of Class and Structure.

**UNIT – II**

Constructor, Initialization using constructor, types of constructor– Default, Parameterized & Copy Constructors, Constructor overloading, Default Values to Parameters, Destructors, Console I/O: Hierarchy of Console Stream Classes, Unformatted and Formatted I/O Operations.

**UNIT – III**

Manipulators, Friend Function, Friend Class, Arrays, Array of Objects, Passing and Returning Objects to Functions, String Handling in C++, Dynamic Memory Management: Pointers, new and delete Operator, Array of Pointers to Objects, this Pointer, Passing Parameters to Functions by Reference & pointers.

Operators in C++, Precedence and Associativity Rules, Operator Overloading, Unary & Binary Operators Overloading, Function Overloading, Inline Functions

**UNIT – IV**

**Inheritance:** Benefit of Inheritance. Overloading and overriding. Different types of Inheritance: Single Inheritance, Multilevel Inheritance, Multiple Inheritance, Hierarchical Inheritance, Hybrid Inheritance, Virtual Base Classes, Abstract Classes. Visibility modifiers in Inheritance.

**Pointer, Virtual Functions and Polymorphism**

Pointers to Objects, this Pointer, Pointers to Derived Classes, Virtual Functions.

**PART B (Laboratory Works)**

Laboratory works based on the syllabus of **PART A**

DEPARTMENT OF INFORMATION TECHNOLOGY/सूचना प्रौद्योगिकी विभाग

त्रिपुरा विश्वविद्यालय / TRIPURA UNIVERSITY

सूर्यमणिनगर / Suryamaninagar, त्रिपुरा/ Tripura - 799022

|                      |                            |
|----------------------|----------------------------|
| Software Engineering | CA3502C                    |
| (T+L): 4 Credits     | Prerequisites: <i>None</i> |

**PART A (Theory)**

**UNIT I**

Software and Software Engineering, Need of Software Engineering, Software Evolution, Software Evolution Laws, E-Type software evolution, Software Paradigms, Features of good software.

Software Lifecycle models: Classical and Iterative Water-fall model, Prototyping, Spiral Model, Rad model, V-model. Comparison of different lifecycle models.

**UNIT II**

Software Project Management: Software projects, Need of Software Project Management, Role of Software Project Manager, Software Management Activities: Project Planning, Scope Management, Project Estimation, Project Estimation Techniques: Decomposition Technique, Empirical Estimation Technique, Software project planning and Estimation Models, Project Scheduling, Risk Analysis and Management, Configuration Management, Project Management Tools: Gantt Chart, PERT Chart, Critical Path Analysis.

Software Requirements: Requirement Process: Feasibility Study, Requirement Gathering, SRS, Software Requirement Validation, Types of Software Requirements, Software System Analyst.

Software Design Basics: Software Design Levels, Modularity, Concurrency, Coupling and Cohesion

Design Modeling: Data Modeling, Functional Modeling, Behavioral Modeling.

Data Flow Diagram: Types of DFD, DFD components, Levels of DFD, Decision Tables, Entity Relationship Model, Data Dictionary

Software Design Strategies: Function Oriented Design and Object Oriented Design, Design Approaches

**UNIT III**

Software Testing: Importance of Testing, Validation and Verification, Testing Approaches: Black Box and White Box Testing, Levels of Testing: Unit Testing, Integration Testing, System Testing, Acceptance Testing, Regression Testing, Test-Cases, Testing

**UNIT IV**

Software Maintenance: Need of maintenance. Types of Software maintenance.

Software Re-Engineering: Source Code Translation, Program Restructuring, Data Re-Engineering, Reverse Engineering.

**PART B (Laboratory Works)**

Laboratory works of Software Development using Python.

DEPARTMENT OF INFORMATION TECHNOLOGY/सूचना प्रौद्योगिकी विभाग

त्रिपुरा विश्वविद्यालय / TRIPURA UNIVERSITY

सूर्यमणिनगर / Suryamaninagar, त्रिपुरा/ Tripura - 799022

|--------------------------|----------------------------|
| <b>Computer Graphics</b> | <b>CA3601C</b>             |
| <b>(T+L): 4 Credits</b>  | Prerequisites: <i>None</i> |

**PART A (Theory)**

**UNIT I**

Computer-Aided Design, Presentation Graphics, Computer Art, Visualization.

Video Display Devices, Color CRT Monitors, Three-Dimensional Viewing Devices, Stereoscopic and Virtual-Reality Systems, Raster-Scan Systems, Video Controller, Raster-Scan Display Processor, Random-Scan Systems, Graphics Monitors and Workstations, Input Devices, Hard-Copy Devices, Graphics Software.

**UNIT II**

Points and Lines, Line Function, Circle-Generating Algorithms, Filled-Area Primitives, Fill-Area Functions, Cell Array.

**UNIT III**

Line Attributes, Curve Attributes, Area-Fill Attributes, Character Attributes, Bundled Attributes, Antialiasing, Pixel Phasing.

**UNIT IV**

Basic Transformations: Translation, Rotation, Scaling. Other Transformations: Reflection, Shear.

**PART B (Laboratory Works)**

Laboratory works based on the syllabus of **PART A**.

DEPARTMENT OF INFORMATION TECHNOLOGY/सूचना प्रौद्योगिकी विभाग

त्रिपुरा विश्वविद्यालय / TRIPURA UNIVERSITY

सूर्यमणिनगर / Suryamaninagar, त्रिपुरा/ Tripura - 799022

---

|                         |                            |
|-------------------------|----------------------------|
| <b>Web Technology</b>   | <b>CA3602C</b>             |
| <b>(T+L): 4 Credits</b> | Prerequisites: <i>None</i> |

**PART A (Theory)**

**UNIT I**

**The internet:** history of the world wide web, hardware and software trend, Client/Server Computing: Middleware, Fat client VS Fat Servers, N-tiered Software Architecture and Web Browser: Browser Architecture.

**UNIT II**

**Introduction of HTML:** introduction, markup language, editing HTML: common tags, headers, text styles, linking, images, formatting text, horizontal rules and more line breaks, lists, ordered and unordered lists, nested lists, basic HTML tables : intermediate HTML tables and formatting : basic HTML forms, more complex HTML forms, internal linking, creating and using image maps.

**UNIT III**

**Java script – introduction to scripting:** introduction- memory concepts- arithmetic- decision making. Java script control structures, Java script functions: introduction – program modules in java script - function definitions, duration of identifiers, scope rules, recursion, java script global functions. Java script arrays: introduction, array-declaring and allocating arrays, references and reference parameters – passing arrays to functions, multiple subscripted arrays. Java script objects: introduction, math, string, data, Boolean and number objects.

**UNIT IV**

**Dynamic HTML : CSS :** introduction – inline styles, creating style sheets with the style element, conflicting styles, linking external style sheets, positioning elements, backgrounds, element dimensions, text flow and the box model, user style sheets. Dynamic HTML: object model and collections: introduction, object referencing, collections all and children, dynamic style, dynamic positioning, using the frames collection, navigator object. Dynamic HTML: event model : introduction, event ON CLICK, event ON LOAD – error handling with ON ERROR, tracking the mouse with event.

**PART B (Laboratory Works)**

Laboratory works based on the syllabus of **PART A**.

सूर्यमणिनगर / Suryamaninagar, त्रिपुरा/ Tripura - 799022

**Departmental Optional Papers I/II (Select any two)**

| Course Code | Course Title                       |
|-------------|------------------------------------|
| CA3001E     | Cloud Computing                    |
| CA3002E     | Cyber Security & Cyber Law         |
| CA3003E     | Data Science                       |
| CA3004E     | Digital Marketing                  |
| CA3005E     | Distributed Computing              |
| CA3006E     | E-Commerce                         |
| CA3007E     | Formal Languages & Automata Theory |
| CA3008E     | Internet of Things                 |

|                        |                            |
|------------------------|----------------------------|
| <b>Cloud Computing</b> | <b>CA3001E</b>             |
| <b>T : 4 Credits</b>   | Prerequisites: <i>None</i> |

**UNIT I: Introduction to Cloud Computing**

Evolution of cloud, Essentials, Cloud Computing definition, Benefits and Challenges, Limitations, Usage and Applications, Business Models around Cloud Computing, Characteristics, Cloud Adoption, Cloud models: Introduction, Collaboration to cloud, Cloud Models, Cloud Applications and Architecture, Cloud Computing Architecture, Cloud Infrastructure Models, Cloud Infrastructure Self Service, Scaling a cloud infrastructure

**UNIT II: Cloud Service**

Introduction to Services, Storage as a Service, Database as a Service, Information as Service, Process as a Service, Application as a Service, Management/Governance as Service, Platform as a Service, Security as a Service, Testing as Service, Integration as Service, Infrastructure as Service

**UNIT III: Software and Service**

Introduction, Mobile Device Integration, Providers, Microsoft Online Intuit Quick base Cast Iron Cloud, Bungee Connect, Introduction to Map Reduce, Google File System, Hadoop framework, Hadoop Distributed File System

**UNIT IV: Virtualization for Cloud**

Introduction, Pros and Cons of Virtualization, Virtualization Architecture, Virtualization Machine, Virtualization in Clusters/Grid Context, Virtual Network, Types of Virtualization, Virtual Machine Monitor, Virtual Desktop Infrastructure

**UNIT V: Visualization for Cloud**

Cloud Computing: Introduction, Types of clouds, Cloud Comparing Approaches, Aneka Integration of private and public cloud, Aneka Cloud Platform, Introduction, Resource Provisioning Service, Aneka Hybrid Cloud Implementation, Comet Cloud Architecture, Autonomic Behaviour, Comet Cloud

DEPARTMENT OF INFORMATION TECHNOLOGY/सूचना प्रौद्योगिकी विभाग

त्रिपुरा विश्वविद्यालय / TRIPURA UNIVERSITY

सूर्यमणिनगर / Suryamaninagar, त्रिपुरा/ Tripura - 799022

|                                     |                            |
|-------------------------------------|----------------------------|
| <b>Cyber Security and Cyber Law</b> | <b>CA3002E</b>             |
| <b>T : 4 Credits</b>                | Prerequisites: <i>None</i> |

**UNIT I: Introduction to Cyber Security**

History of Internet, Cyber Crime, Information Security, Computer Ethics and Security Policies, Guidelines to choose web browsers, Securing web browser, Antivirus, Email security.

**UNIT II: Guidelines for social media and different security**

Guidelines for social media security , Tips and best practices for safer Social Networking , Basic Security for Windows, User Account Password, Guidelines for setting up a Secure password , Two-steps authentication , Password Manager, Wi-Fi Security.

**UNIT III: Smartphone security and Cyber Security Initiatives in India**

Introduction to mobile phones, Smartphone Security, Android Security, IOS Security, Counter Cyber Security Initiatives in India, Cyber Security Exercise, Cyber Security Incident Handling , Cyber Security Assurance.

**UNIT IV: Online Banking, Credit Card and UPI , Micro ATM, e-wallet and POS Security**

Online Banking Security, Mobile Banking Security, Security of Debit and Credit Card, UPI Security, Security of Micro ATMs, e-wallet Security Guidelines, Security Guidelines for Point of Sales(POS)

**UNIT V: Social Engineering and Cyber Security Threat Landscape and Techniques**

Social Engineering, Types of Social Engineering, How Cyber Criminal Works, How to prevent for being a victim of Cyber Crime, Cyber Security Threat Landscape, Emerging Cyber Security Threats , Cyber Security Techniques. Firewall.

**UNIT VI : IT Security Act and Misc. Topics**

IT Act, Hackers-Attacker-Countermeasures, Web Application Security, Digital Infrastructure Security, Defensive Programming.

|                     |                            |
|---------------------|----------------------------|
| <b>Data Science</b> | <b>CA3003E</b>             |
| <b>T: 4 Credits</b> | Prerequisites: <i>None</i> |

**UNIT I**

Introduction Motivation, Importance, Definitions, Kind of Data, Data Mining Functionalities, Kinds of Patterns, Classification of Data Mining Systems, Data Mining Task Primitives, Integration of a Data Mining System with A Database or Data Warehouse System, Major Issues in Data Mining, Types of Data Sets and Attribute Values, PREPROCESSING: Data Quality, Major Tasks in Data Pre-processing, Data Reduction, Data Transformation and Data Discretization, Data Cleaning and Data Integration

**UNIT II**

Data Warehousing and on-line Analytical Processing Data Warehouse basic concepts, Data Warehouse Modeling - Data Cube and OLAP, Data Warehouse Design and Usage, Data Warehouse Implementation, Data Generalization by Attribute-Oriented Induction, Data Cube Computation

DEPARTMENT OF INFORMATION TECHNOLOGY/सूचना प्रौद्योगिकी विभाग

त्रिपुरा विश्वविद्यालय / TRIPURA UNIVERSITY

सूर्यमणिनगर / Suryamaninagar, त्रिपुरा/ Tripura - 799022

---

**UNIT III**

Patterns, Associations and Correlations Mining Frequent Patterns, Associations and Correlations: Basic Concepts, Efficient and Scalable Frequent Itemset, Mining Methods, Pattern Evaluation Methods, Applications of frequent pattern and associations, Frequent Patterns and Association Mining: A Road Map, Mining Various Kinds of Association Rules, Constraint-Based Frequent Pattern Mining, Extended Applications of Frequent Patterns

**UNIT IV**

Classification Basic Concepts, Decision Tree Induction, Bayesian Classification Methods, Rule-Based Classification, Model Evaluation and Selection, Techniques to Improve Classification Accuracy: Ensemble Methods, Handling Different Kinds of Cases in Classification, Classification by Neural Networks, Support Vector Machines, Pattern-Based Classification, Lazy Learners (or Learning from Your Neighbors)

**UNIT V**

Cluster Analysis Basic Concepts of Cluster Analysis, Clustering Structures, Major Clustering Approaches, Partitioning Methods, Hierarchical Methods, Density-Based Methods, Model-Based Clustering, Why outlier analysis, Identifying and handling of outliers, Outlier Detection Techniques, WEB MINING: Basic concepts of web mining, different types of web mining, PAGE RANK Algorithm, HITS Algorithm

|                          |                            |
|--------------------------|----------------------------|
| <b>Digital Marketing</b> | <b>CA3004E</b>             |
| <b>T : 4 Credits</b>     | Prerequisites: <i>None</i> |

**UNIT I**

Introduction to Digital Marketing and its Significance, Traditional Marketing Vs Digital Marketing, Digital Marketing Process, Website Planning and Development: Types of websites, Understanding Domain and Webhosting, Building Website/Blog using CMS WordPress, Using WordPress Plug-ins

**UNIT II**

Introduction to Search Engine Optimization, Keyword, Planner Tools, On Page SEO Techniques- Indexing and Key Word Placement, Content Optimization, On Page SEO : Yoast SEO Plug-in, Off –Page SEO Techniques, Email Marketing- Introduction and Significance, Designing e-mail marketing campaigns using Mail Chimp, Building E-mail List and Signup Forms, Email Marketing Strategy and Monitoring, Email –Automization.

**UNIT III**

Pay Per Click Advertising: Introduction, Pay Per Click Advertising: Google Adword, Types of Bidding strategies, Designing and Monitoring search campaigns, Designing and Monitoring Display campaigns, Designing and Monitoring Video campaigns, Designing and Monitoring Universal App Campaigns, Google Analytics: Introduction and Significance, Google Analytics Interface and Setup, Understanding Goals and Conversions, Monitoring Traffic Behavior and preparing Reports, Social Media Marketing : Introduction and Significance, Facebook Marketing: Introduction Types of Various Ad Formats

**UNIT IV**

Setting up Facebook Advertising Account, Understanding Facebook Audience and its Types, Designing Facebook Advertising Campaigns, Working with Facebook Pixel, Twitter Marketing: Basics, Twitter Marketing: Basics, Introduction to LinkedIn Marketing, Developing digital marketing strategy in Integration form.

DEPARTMENT OF INFORMATION TECHNOLOGY/सूचना प्रौद्योगिकी विभाग

त्रिपुरा विश्वविद्यालय / TRIPURA UNIVERSITY

सूर्यमणिनगर / Suryamaninagar, त्रिपुरा/ Tripura - 799022

|                              |                            |
|------------------------------|----------------------------|
| <b>Distributed Computing</b> | <b>CA3005E</b>             |
| <b>T : 4 Credits</b>         | Prerequisites: <i>None</i> |

**UNIT I**

**Characterization of Distributed Systems:** Introduction, Examples of Distributed systems, Resource sharing and web, challenges.

**System Models:** Introduction, Architectural and Fundamental models

**UNIT II**

**Time and Global States:** Introduction, Clocks, Events and Process states, Synchronizing physical clocks, Logical time and Logical clocks, Global states, Distributed Debugging

**Coordination and Agreement:** Introduction, Distributed mutual exclusion, Elections, Multicast Communication, Consensus and Related problems

**UNIT III**

**Inter Process Communication:** Introduction, The API for the internet protocols, External Data Representation and Marshalling, Client-Server Communication, Group Communication, Case Study: IPC in UNIX.

**Distributed Objects and Remote Invocation:** Introduction, Communication between Distributed Objects, Remote Procedure Call, Events and Notifications, Case study-Java RMI

**UNIT IV**

**Distributed File Systems:** Introduction, File service Architecture, Case Study1: Sun Network File System, Case Study 2: The Andrew File System

**Name Services:** Introduction, Name Services and the Domain Name System, Directory Services, Case study of the Global Name Service

**Distributed Shared Memory:** Introduction Design and Implementation issues, Sequential consistency and Ivy case study, Release consistency and Munin case study, other consistency models

**UNIT V**

**Transactions and Concurrency Control:** Introduction, Transactions, Nested Transactions, Locks, Optimistic concurrency control, Timestamp ordering, Comparison of methods for concurrency control

**Distributed Transactions:** Introduction, Flat and Nested Distributed Transactions, Atomic commit protocols, Concurrency control in distributed transactions, Distributed deadlocks, Transaction recovery.

|                      |                            |
|----------------------|----------------------------|
| <b>E-Commerce</b>    | <b>CA3006E</b>             |
| <b>T : 4 Credits</b> | Prerequisites: <i>None</i> |

**UNIT-I**

**Electronic Commerce:** Overview, Definitions, Advantages & Disadvantages of E-Commerce, Threats of E-Commerce, Managerial Prospective, Rules & Regulations For Controlling E-Commerce, Cyber Laws.

**BACHELOR IN COMPUTER APPLICATIONS (BCA)**

DEPARTMENT OF INFORMATION TECHNOLOGY/सूचना प्रौद्योगिकी विभाग

त्रिपुरा विश्वविद्यालय / TRIPURA UNIVERSITY

सूर्यमणिनगर / Suryamaninagar, त्रिपुरा/ Tripura - 799022

UNIT-II

**Technologies:** Relationship Between E-Commerce & Networking, Different Types of Networking For E-Commerce, Internet, Intranet & Extranet, EDI Systems Wireless Application Protocol: Definition, Hand Held Devices, Mobility & Commerce, Mobile Computing, Wireless Web, Web Security, Infrastructure Requirement For E-Commerce.

UNIT-III

**Business Models of e-commerce:** Model-Based On Transaction Type, Model Based On Transaction Party - B2B, B2C, C2B, C2C, E-Governance.

UNIT-IV

**Content Management:** Definition of content, Authoring Tools & Content Management, Content – partnership, repositories, convergence, providers, Web Traffic & Traffic Management; Content Marketing.

UNIT-V

**Call Center:** Definition, Need, Tasks Handled, Mode of Operation, Equipment, Strength & Weaknesses of Call Center, Customer Premises Equipment (CPE).

UNIT-VI

**E – Payment Mechanism:** Payment through a card system, E – Cheque, E-Cash, E – Payment Threats & Protections.

UNIT-VII

**Electronic Data Interchange (EDI):** Meaning, Benefits, Concepts, Application, EDI Model, Protocols (UN EDI FACT Data Encryption (DES / RSA).

UNIT-VIII

**Risk of E-Commerce:** Overview, Security for E-Commerce, Security Standards, Firewall, Cryptography, Key Management, Password Systems, Digital certificates, Digital signatures.

|                                               |                            |
|-----------------------------------------------|----------------------------|
| <b>Formal Languages &amp; Automata Theory</b> | <b>CA3007E</b>             |
| <b>T : 4 Credits</b>                          | Prerequisites: <i>None</i> |

UNIT-I

**Mathematical Preliminaries :** Sets, Relations and Functions (Brief Discussion), Graphs, Trees, Strings and their properties: Definition, operation on strings, palindrome, prefix & suffix of a string, Levi theorem (Statement only), Terminal & Non-terminal symbols. The Theory of Automata.

UNIT-II

**Definition of an Automaton:** Definition of finite Automaton, Block diagram of finite Automaton, Transition system, Properties of Transition Functions, Acceptability of a Page 26 of 46 string by Finite Automaton. Definition of DFA and NFA, The equivalence of DFA and NFA. Mealy and Moore machine.

UNIT-III

**Formal Language:** Concept of a language, Definition of a grammar, Language generated by a grammar (definition with application). Chomsky classification of languages (definition), Relation between the classified languages. Recursive and recursively enumerable set (definitions).

DEPARTMENT OF INFORMATION TECHNOLOGY/सूचना प्रौद्योगिकी विभाग

त्रिपुरा विश्वविद्यालय / TRIPURA UNIVERSITY

सूर्यमणिनगर / Suryamaninagar, त्रिपुरा/ Tripura - 799022

---

**UNIT-IV**

**Regular Sets & Regular Grammar:** Definition of Regular expression and regular set, Identities of regular expressions Relation between regular expression and finite automata, Transition system containing  $\wedge$ - moves (application), Conversion of Non-deterministic systems to deterministic system (application), Construction of finite automata equivalent to a regular expression (with application).

**UNIT-V**

**Context-Free LANGUAGES & Pushdown Automata:** Introduction – Definition – Derivation trees (Definitions & application) – Ambiguity in CFG, Basic definition of PDA .

|                           |                            |
|---------------------------|----------------------------|
| <b>Internet of Things</b> | <b>CA3008E</b>             |
| <b>T : 4 Credits</b>      | Prerequisites: <i>None</i> |

**UNIT I**

Introduction to IOT, Sensing, Actuation, Basics of IoT Networking, Communication Protocols, Sensor networks, Machine-to-Machine Communications.

**UNIT II**

Interoperability in IoT, Introduction to Arduino programming. Integration of Sensors/Actuators to Arduino.

**UNIT III**

Introduction to Python programming, Introduction to Raspberry Pi, Implementation of IoT with Raspberry Pi, Introduction to SDN, SDN for IoT, Data Handling and Analytics.

**UNIT IV**

Cloud Computing, Sensor-Cloud, Fog Computing, Smart Cities and Smart Homes, Connected Vehicles, Smart Grid, Industrial IoT, Case Study: Agriculture, Healthcare, Activity Monitoring, Understand the ethical issues in IoT (K3), Analyze the implementational environment and identify probable ethical solution to address any issue. (K4).

| IV | VII  | CA4701C     | Introduction to AI & Machine Learning | 4(T+L)    | Major-17         |
|    |      | CA4702C     | Discrete Mathematical Science         | 4(T)      | Major-18         |
|    |      | CA4703C     | Research Project/Dissertation Phase-I | 4(L)      | Major-19         |
|    |      | CA40XXE     | Departmental Optional Paper-III       | 4(T)      | Major-20         |
|    |      |             | Minor/Elective-VII                    | 4         | Minor/Elective-7 |
|    |      |             | <b>Total Credits of Semester VII</b>  | <b>20</b> |                  |
|    | VIII | CA4801C     | Software Project Management           | 4(T+L)    | Major-21         |
|    |      | CA4802C     | Research Project Phase-II             | 4(L)      | Major-22         |
|    |      | CA4803C     | Dissertation & Presentation           | 4(L)      | Major-23         |
|    |      | CA40XXE     | Departmental Optional Paper-IV        | 4(T)      | Major-24         |
|    |      |             | Minor/Elective-VIII                   | 4         | Minor/Elective-8 |
|    |      |             | <b>Total Credits of Semester VIII</b> | <b>20</b> |                  |

**Departmental Optional Papers III/IV (Select any two)**

| Course Code | Course Title              | Course Code | Course Title                  |
|-------------|---------------------------|-------------|-------------------------------|
| CA4001E     | Adhoc& Sensor Network     | CA4005E     | Information & System Security |
| CA4002E     | Advanced DBMS             | CA4006E     | Numerical Methods             |
| CA4003E     | Deep Learning             | CA4007E     | Mobile Computing              |
| CA4004E     | Digital Signal Processing | CA4008E     | Soft Computing                |

**Total Cumulative Credits after completion of 4<sup>th</sup>Year=154+8\* =162 Credits**

- 96 credits Major
- 32 Credits Minor
- 9 Credits Interdisciplinary Course (Prerequisite Allied/MOOC)
- 9 Credits Skill Enhancement/ Vocational
- 8 Credits Ability Enhancement Courses (language)
- 8\* Credits Common Value-Added Courses (VAC Project/ Internship/ Survey)

Students Exiting the program after securing above Credits will be awarded **BACHELOR IN COMPUTER APPLICATIONS (BCA) WITH RESEARCH**

N.B. 50% courses of minor stream must be from the relevant subject/discipline and remaining 50% from any discipline.

**BACHELOR IN COMPUTER APPLICATIONS (BCA)**

DEPARTMENT OF INFORMATION TECHNOLOGY/सूचना प्रौद्योगिकी विभाग  
त्रिपुरा विश्वविद्यालय / TRIPURA UNIVERSITY  
सूर्यमणिनगर / Suryamaninagar, त्रिपुरा/ Tripura - 799022

|                                                  |                                   |
|--------------------------------------------------|-----------------------------------|
| <b>Introduction to AI &amp; Machine Learning</b> | <b>CA4701C</b>                    |
| <b>T : 4 Credits</b>                             | Prerequisites: <i>Probability</i> |

**UNIT I**

Introduction: Philosophy of AI, Definitions, Probability Theory, Linear Algebra, Convex Optimization Introduction to Statistical Decision Theory - Regression, Classification, Bias Variance, Linear Regression, Multivariate Regression, Subset Selection, Shrinkage Methods, Principal Component Regression, Partial Least squares Linear Classification, Logistic Regression, Linear Discriminant Analysis

**UNIT II**

Perceptron, Support Vector Machines, Neural Networks - Introduction, Early Models, Perceptron Learning, Backpropagation, Initialization, Training & Validation, Parameter Estimation - MLE, MAP, Bayesian Estimation, Decision Trees, Regression Trees, Stopping Criterion & Pruning loss functions, Categorical Attributes, Multiway Splits, Missing Values, Decision Trees - Instability Evaluation Measures, Bootstrapping & Cross Validation, Class Evaluation Measures, ROC curve, MDL, Ensemble Methods - Bagging, Committee Machines and Stacking, Boosting

**UNIT III**

Gradient Boosting, Random Forests, Multi-class Classification, Naive Bayes, Bayesian Networks, Undirected Graphical Models, HMM, Variable Elimination, Belief Propagation, Partitional Clustering, Hierarchical Clustering, Birch Algorithm, CURE Algorithm, Density-based Clustering, Gaussian Mixture Models, Expectation Maximization, Learning Theory,

**UNIT IV**

Modeling a Problem as Search Problem, Uninformed Search, Heuristic Search, Domain Relaxations, Local Search, Genetic Algorithms, Adversarial Search, Constraint Satisfaction, Propositional Logic & Satisfiability, Uncertainty in AI, Bayesian Networks

**UNIT V**

Bayesian Networks Learning & Inference, Decision Theory, Markov Decision Processes, Introduction to Reinforcement Learning, Optional videos (RL framework, TD learning, Solution Methods, Applications), Introduction to Deep Learning & Deep RL

DEPARTMENT OF INFORMATION TECHNOLOGY/सूचना प्रौद्योगिकी विभाग

त्रिपुरा विश्वविद्यालय / TRIPURA UNIVERSITY

सूर्यमणिनगर / Suryamaninagar, त्रिपुरा/ Tripura - 799022

|                                      |                            |
|--------------------------------------|----------------------------|
| <b>Discrete Mathematical Science</b> | <b>CA4702C</b>             |
| <b>T : 4 Credits</b>                 | Prerequisites: <i>None</i> |

**UNIT I**

Sets, Proof Templates, and Induction, Describing Sets Mathematically, Set Membership, Equality of Sets, Finite and Infinite Sets, Relations Between Sets, Venn Diagrams, Operations on Sets, Union and Intersection, Set Difference, Complements, and DeMorgan's Laws, Power Sets and Products, Lattices and Boolean Algebras, The Principle of Inclusion-Exclusion, Finite Cardinality, Principle of Inclusion-Exclusion for Two Sets, Three Sets, Finitely Many Sets, Mathematical Induction, Algorithm to Generate Perfect Squares Two Algorithms for Computing Square Roots Strong Form of Mathematical Induction

**UNIT II**

Formal Logic, Introduction to Propositional Logic, Expression Trees for Formulas, Abbreviated Notation for Formulas, Using Gates to Represent Formulas, Truth and Logical Truth, Tautologies, Substitutions into Tautologies, Logically Valid Inferences, Combinatorial Networks, Substituting Equivalent Subformulas, Simplifying Negations, Normal Forms, Disjunctive Normal Form, Application: DNF and Combinatorial Networks, Conjunctive Normal Form, CNF and Combinatorial Networks, Testing Satisfiability and Validity, Predicates and Quantification, Restricted Quantification, Nested Quantifiers, Negation and, Quantification with Conjunction and Disjunction

**UNIT III**

Relations: Binary Relations, n-ary Relations, Operations on Binary Relations, Inverses, Composition, Special Types of Relations, Reflexive and Irreflexive Relations, Symmetric and Antisymmetric Relations, Transitive Relations, Reflexive, Symmetric, and Transitive Closures, Equivalence Relations, Partitions, Comparing Equivalence Relations, Ordering Relations. Functions, Operations on Functions, Sequences and Subsequences, The Pigeon-Hole Principle, Countable and Uncountable Sets, Analysis of Algorithms, Complexity of Programs, Uncomputability

**UNIT IV**

Graph Theory: Introduction to Graph, The Handshaking Problem, Paths and Cycles, Graph Isomorphism, Representation of Graphs, Connected Graphs, The Königsberg Bridge Problem, Trees, Spanning Trees, Rooted Trees, Directed Graphs, Finding a Cycle in a Directed Graph, Priority in Scheduling, Connectivity in Directed Graphs, Eulerian Circuits in Directed Graphs

|                                    |                            |
|------------------------------------|----------------------------|
| <b>Software Project Management</b> | <b>CA4801C</b>             |
| <b>T : 4 Credits</b>               | Prerequisites: <i>None</i> |

**UNIT I**

Defining of Software Development Process - Process - Tailoring the Process - Improving the process discipline - Need for implementing discipline. Software Production Process - Identify the Software Model - Software Process Models : Waterfall Model, Prototyping Model, RAD Model, Incremental Model, Spiral Model, Component Assembly Model - Software Life Cycle.

**UNIT II**

Software Development Team - Three Vital Aspects of Software Project Management - The Team - Meaning of Leadership - Communicating in Harmony - Personality traits - Project Organizations. Project Planning: Top-Down and Bottom-Up Planning - Types of Activity - Project Duration : Schedule Monitoring Tools - Gantt Chart, PERT Chart, Critical Path.

**UNIT III**

Tracking Meetings - Recovery plans - Schedule Work & Escalation Meetings. Project Engineering: Product Requirements - Understanding the Customer Problem to solve - Initial Investigation, Strategies for determining information requirements, Information gathering Tools - Product Objectives.

**UNIT IV**

Product Specifications - Defining the Final Product - Data Flow Diagram, Data Dictionary, Structured English, Decision Trees, Decision Tables - Feasibility Study. Software Testing : Test Plan - Development Testing : Verification and Validation - General Testing Methods : White Box and Black Box Testing - Unit Testing - System Integration Testing - Validation Testing - System testing.

**UNIT IV**

Software Quality - Quality Measures - FURPS - Software Quality Assurance - Software Reviews - Format Technical Review (FTR) Formal Approaches to SQA - Software Reliability - Introduction to SQA - The Software Quality Assurance Plan - Formal approaches to SQA - Clean room Methodology.
